

2020 LONG(EST) DAY OF GOLF

OCTOBER 12, 2020 AT RICH HARVEST FARMS, SUGAR GROVE, IL

12TH ANNUAL GOLF FUNDRAISER

For over 10 years, golfers have been raising funds for medical repurposing research at Cures Within Reach's annual LDOG event. In 2020, we will again play at **Rich Harvest Farms**, an exclusive private course rarely accessible by non-members, named the 5th best new private course in the US by *Golf Digest* when it debuted in 1999.

While the COVID19 pandemic continues to be a critical focus, we've rescheduled our event to October 12 and hope that by then the worst will be behind us – and a day on the golf course sounds like a needed date on the calendar. We can be physically distant without being socially distant!

Join as a single, a twosome or a foursome; no more than 40 golfers on the course!

FUNDING GAME-CHANGING CLINICAL TRIALS THAT MAKE REAL PATIENT IMPACT

Prior to October 12, registered golfers **donate or raise at least \$1,500 (\$6,000 for a foursome)** for Cures Within Reach. **This year, a portion of the proceeds from this event will help to fund an infectious disease project.** Past events have supported clinical trials in:

- **Oncology:** Metastatic thyroid cancer, brain cancer, prostate cancer, pediatric cancer
- **Pediatric Diseases:** Autoimmune diseases, oncology, rare liver disease, malnutrition
- **Neurological Diseases:** Alzheimer's disease, autism

SUPPORTING OUR GOLFERS

Cures Within Reach supports our golfers' fundraising by providing:

- Individual donation web pages
- Print and social media materials to share
- Documents to support corporate matching and company sponsorship of a player or team

Lunch plus post-golf food / beverages are included, as well as a tour of owner Jerry Rich's private Car Museum.

To reserve your spot, call or e-mail us: admin@cureswithinreach.org or 847-745-1252

Together We're Making Real Patient Impact

Cures Within Reach improves patient quality and length of life by leveraging the speed, safety and cost-effectiveness of medical repurposing research, driving more treatments to more patients more quickly
