Clinical Repurposing Research to Impact Veterans

Description / Background
This Request for Proposals (RFP) is seeking repurposed treatments to address unmet and high priority medical needs of veterans, including mental health, post-traumatic stress disorder (PTSD) and brain injuries, with up to $50,000 in funding for a repurposing clinical trial.

We are interested in generic or proprietary drugs, devices, nutraceuticals or diagnostics that could be repurposed to create "new" treatments to 1) reduce the symptoms, progression or incidence of; 2) restore function lost to; or 3) to reduce or eliminate severe side effects of currently used therapies for any unsolved medical need facing veterans, thereby improving patient outcomes and quality of life.

Repurposed therapies can be used alone or in combination with other therapies. Therapies must already be FDA approved or otherwise readily available for human use.

While repurposing clinical trial projects are eligible for this round of funding, we welcome proposals for any research stage / type, which may be considered for future funding opportunities. If you are interested in sharing a veterans-focused preclinical repurposing research idea, please contact Clare Thibodeaux, PhD at clare@cureswithinreach.org.

Cures Within Reach is circulating this RFP in order to find potential treatments for unsolved diseases and conditions facing veterans, including mental health, PTSD and brain injuries. An unsolved disease or condition is one in which one or more of the following are true:

- There is currently no effective treatment
- The current treatment is only effective for a portion of the patient population
- There is a treatment that is effective, but many patients develop resistance to the therapy
- There is a treatment that is effective for the entire patient population, but the treatment is very expensive, and therefore some patients cannot get access to the treatment
- There is a treatment that is effective for the entire patient population with significant side effects, and for some patients the negative side effects outweigh the benefits of the treatment
Many of our successes in repurposing have come from researchers and clinicians who had ideas that could impact a disease that was outside their normal therapeutic or scientific area. Please submit your repurposing ideas, find colleagues to work with and circulate this RFP to others who you think might be able to submit repurposing research that could provide solutions for an unsolved disease.

Important Funding Information:

Cures Within Reach will provide no more than 80% of the REQUESTED PROJECT FUNDING, and the institution, organization or company proposing the research will match at least 20% of the REQUESTED PROJECT FUNDING. The REQUESTED PROJECT FUNDING is equal to the ESTIMATED OVERALL PROJECT COSTS in the BUDGET BREAKDOWN section of the proposal submission, and includes the 20% Institutional Match. The Institutional Match must be real dollars committed to the project, not in-kind efforts, and can include Indirect Costs, The Institutional Match can come from the Research Institution itself (including salaries, patient costs, etc.); from government or other public funders; from individuals, foundations or other private funders; or from any combination of these sources.

For VA hospitals and VA-related nonprofits ONLY: the Institutional Match may include funding from either or both organizations (example: salaries paid by both the VA hospital and the VA-related nonprofit).

All funding amounts and requests are in US dollars.

Funding Definitions:

- Project Funding = total research budget (no set maximum)
- Remaining Project Funding = funding needed to reach the total research budget (no set maximum)
- Existing Project Funding = Project Funding minus Remaining Project Funding (no set maximum)
- Requested Project Funding = funding requested through this RFP (maximum = $50,000, including the 20% institutional match)
- Budget Breakdown = breakdown of the Requested Project Funding (maximum total = $50,000, including 20% institutional match)
- Estimated Overall Project Costs = Requested Project Funding (see above)

Cures Within Reach will accept REQUESTED PROJECT FUNDING amounts that are within the minimum and maximum amounts indicated. We do not set an upper limit to the PROJECT FUNDING, or the EXISTING PROJECT FUNDING, but REQUESTED PROJECT FUNDING amounts to Cures Within Reach are limited to the maximum amount specified in the Funding Information section below. Proposals may be submitted for which the PROJECT FUNDING is within the Cures Within Reach maximum, and for projects that already have EXISTING PROJECT FUNDING from another source and require REMAINING PROJECT FUNDING, when this additional funding from Cures Within Reach will help speed patient impact.

Cures Within Reach REQUESTED PROJECT FUNDING must be sole, late or final funding for the project. REQUESTED PROJECT FUNDING from Cures Within Reach cannot be the first funding raised for a project, unless the REQUESTED PROJECT FUNDING, including the 20% Institutional Match, equals the PROJECT FUNDING.
Here are two examples of funding requests and disbursements to help investigators and institutions understand the funding opportunity.

**Example A**

The maximum funding request is $50,000. The PI enters $50,000 for REQUESTED PROJECT FUNDING and for ESTIMATED OVERALL PROJECT COSTS in the BUDGET BREAKDOWN, which equals the PROJECT FUNDING. CWR approves this project, and will provide $40,000 (80% of the REQUESTED PROJECT FUNDING) and the institution will match the remaining $10,000 of the REQUESTED PROJECT FUNDING.

**Example B**

The maximum funding request is $50,000. The PI enters $50,000 for REQUESTED PROJECT FUNDING and for ESTIMATED OVERALL PROJECT COSTS in the BUDGET BREAKDOWN, which will cover one-third of the $150,000 entered for PROJECT FUNDING. The other $100,000 is entered for EXISTING PROJECT FUNDING, and has already been secured by the investigator and institution. CWR approves this project, and will provide $40,000 (80% of the REQUESTED PROJECT FUNDING) and the institution will match the remaining $10,000 of the REQUESTED PROJECT FUNDING and provide the $100,000 of the EXISTING PROJECT FUNDING from other funding sources.

### Diseases/Conditions

| Any unmet medical need impacting veterans, including mental health, post-traumatic stress disorder and brain injuries |

### Treatments

| Any repurposed drugs, devices, nutraceuticals or diagnostics |

### Project Type

- Human Clinical Trial

### Timeline

### Do you have a preference for where the research should take place?

This research can take place anywhere in United States where good scientific research and clinical practices can be assured. This RFP is open to PIs at VA hospitals, accredited academic, nonprofit and governmental research institutions and/or large group medical practices significantly involved with medical research.
Do you have a preference for where you would like to see patient impact?
This RFP is open to treatments for any unsolved disease or unmet medical need facing veterans, including mental health, post-traumatic stress disorder and brain injuries.

Restrictions
There are no other restrictions other than those described above.

Other Information for Researchers
Cures Within Reach and our funders primarily fund proof of concept clinical trials that can determine whether a repurposed therapy can have a direct and positive impact on patients. Sometimes the clinical trials in our portfolio are open label studies with clinical endpoints that compare to the natural history of the disease. Other clinical trials are randomized, blinded and controlled studies. We are open to all clinical trial designs that have the opportunity to create a robust and well-defined outcome that will show reproducible clinical impact.

Cost effectiveness, speed and patient impact are key ranking criteria for a successful Proposal submission. Cures Within Reach expects to select a small number of Proposals to be chosen for a Full Grant submission. PIs will receive a decision on their Proposal within approximately 6-8 weeks of the RFP deadline.

While repurposing clinical trial projects are eligible for this round of funding, we welcome proposals for any research stage / type, which may be considered for future funding opportunities. If you are interested in sharing a veterans-focused preclinical repurposing research idea, please contact Clare Thibodeaux, PhD at clare@cureswithinreach.org.

Funding Available
Minimum $25,000

Maximum $50,000

Funding Description
See full Funding information in the Research Description section above. Cures Within Reach will accept REQUESTED PROJECT FUNDING amounts that are within the minimum and maximum amounts indicated. Cures Within Reach REQUESTED PROJECT FUNDING must be sole, late or final funding for the project, as indicated in the Research Description. Cures Within Reach will provide no more than 80% of the REQUESTED PROJECT FUNDING, and the institution, organization or company proposing the research will match at least 20% of the REQUESTED PROJECT FUNDING. The Institutional Match must be real dollars committed to the project, not in-kind efforts, and can include Indirect Costs. The Institutional Match can come from the Research Institution itself (including salaries, patient costs, etc.); from government or other public funders; from individuals, foundations or other private funders; or from any combination of these
sources. For VA hospitals and VA-related nonprofits ONLY: the Institutional Match may include funding from either or both organizations (example: salaries paid by both the VA hospital and the VA-related nonprofit). All funding amounts are in US dollars.

Open to co-funding

---

**Co-Funding Description**

We will accept projects that already have funding from another source and require additional funding, when this additional funding from Cures Within Reach will help improve the chances of success of the project, and therefore increase the chance of patient impact. Cures Within Reach REQUESTED PROJECT FUNDING must be sole, late or final funding for the project, as indicated in the Research Description. We are open to working with other funders who share our desire to find treatments for unmet medical needs facing veterans and are interested in these near-term repurposing opportunities.
