

Researcher Spotlight

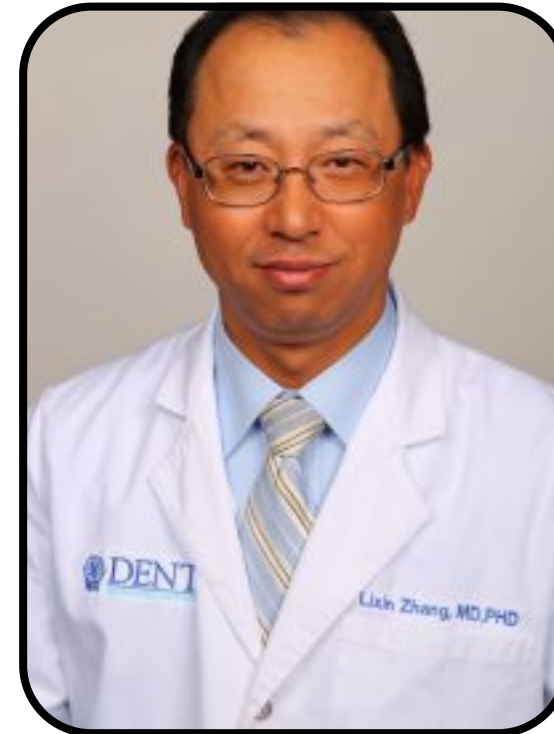

Pioneering Research and Care in Neurological Disorders

**Dr. Lixin
Zhang**

Dr. Lixin Zhang at **Dent Neurologic Institute** conducted a now completed study that combined anti-epilepsy and anti-anxiety oral drugs to reduce Meniere's disease symptoms and improve quality of life for patients, while also collecting data on any potential impact of the drug combination on progressive inner ear damage and hearing loss.

As a board certified neurologist with more than 20 years of clinical and research experience, Dr. Zhang is a respected leader in the field of neuroscience.

His career reflects a deep commitment to advancing neurological care, with extensive contributions to both personalized patient treatment and scientific discovery, including authoring many peer reviewed publications, underscoring his dedication to his research. As a Buffalo magazine shared, "Dr. Zhang is truly a healthy hero. He simply wants to help make people feel better."

Profile

Dr. Zhang received his MD from Weifang Medical College in China and completed his residency and fellowship at SUNY Buffalo. He currently serves as an Attending Neurologist and Director of the Dizziness and Balance Center at Dent Neurologic Institute.

CWR Funding

In this completed trial, Dr. Zhang and his team studied the combination of an anti-epileptic and an anti-anxiety drug to treat Meniere's disease. Dr. Zhang and this trial represent Cures Within Reach's focus on unsolved diseases, in this case within Ear Nose Throat.

Cures Within Reach is testing already approved treatments for unsolved diseases:
driving more treatments to more patients more quickly
